Art Unit: 2635

1. This Office action is in response to the application filed March 12, 2004. Claims 1-5 are pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bruno Boily on February 10, 2006.

The application has been amended as follows:

In the claims:

Claim 1. (Currently Amended) A method of using an anti-fraud card system comprising a card component and a transmitter component both physically separate and distinct from each other, the card including a built-in battery, a CPU to handle various processes, a non-volatile memory to hold coding information, a signal strip and a receiver, and the transmitter including a transmitter module and a keypad, the method comprising:

activating a first third of a code by pressing a button sequence on the keypad prior to a vendor swiping the card;

transmitting by said transmitter said first third of the code with a second third of the stored at the transmitter to the card;

combining a third third of a code in the non-volatile memory of the card with the first and second third of the code received from the transmitter to create a complete ID code;

Art Unit: 2635

sending the ID code via a signal strip on the card in a pattern readable by a standard magnetic strip reader at the vendor; and

causing the card to be unusable by erasing said code parts sent by the transmitter as soon as the transmitter stops sending code signal.

In the specification:

On page 4, line 7; change "Sschematic" to "Schematic"

3. Claims 1-5 are allowed.
4. The following is an examiner's statement of reasons for allowance: the claims recite a method of using an anti-fraud card system by combining a first, second, and third code to form an ID code wherein the ID code is the combination of an input code, a code stored on the transmitter, and a code stored on the card. Such a combination is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert K. Wong whose telephone number is 571-272-3057. The examiner can normally be reached on M-Th.
